

EH horizontal wrapping machine

- ➔ Ideal for wrapping long loads, for example Panels, Plasterboard, sandwich boards, pipes, extruded aluminium and other long loads.
- ➔ Ring sizes from 600mm to 2200mm to custom build for horizontally wrapping your loads.

Specification

| Machine | EH800 | EH1000 | EH1600 | EH2000 |
|-------------------------------|---------------------|---------------------|---------------------|---------------------|
| Packing efficiency | 4-15m/min | 4-12m/min | 4m-9m/min | 4m-7m/min |
| Max load size diagonal | 600mm | 800mm | 1300mm | 1700mm |
| Ring inner diameter | 800mm | 1000mm | 1600mm | 2000mm |
| Ring speed | 15-50rpm | 15-40rpm | 15-35rpm | 15-25rpm |
| Film carriage | Brake film | Brake film | Brake film | Brake film |
| Machine power | 380V,3Phase,50/60Hz | 380V,3Phase,50/60Hz | 380V,3Phase,50-60Hz | 380V,3Phase,50-60Hz |

Control

Siemens Advanced PLC & Siemens 7" touch screen , easy to erate the stretch wrapper

Parameters setting from touch screen: Ring speed, conveyor speed, head&tail wrapping times (1-9)

Counter to count the numbers of rolls be wrapped

Separate Auto-Start/Reset, Pause & E/S buttons

Available Options

Product Stabilizers :Stabilizers support top, bottom and side of the product and guide the product guide through the wrap zone during the wrapping process. Particularly suitable for light and unstable products.

Conveyor type: Chain conveyor, belt conveyor, roller conveyor to custom build according your application

Auto cut& grab film unit: Automatically cut and grab film tail at end of cycle. More quicker.
